

Professor Wanchun Xiang received his M.S. from Shaanxi Normal University in 2005 and his PhD from the Institute of Chemistry, Chinese Academy of Sciences in 2010. After three years of postdoctoral research at the Department of Chemistry, Monash University (Australia), he joined the State Key Laboratory of Silicate Materials for Architectures, Wuhan University of Technology as an associate professor in 2014. He was a visiting professor in École Polytechnique Fédérale de Lausanne (EPFL) in 2017-2018. He has been a professor at Shaanxi Normal University since 2020. His research interests include optoelectronic materials and their applications in photovoltaic devices, such as dye-sensitized solar cells and perovskite solar cells.
